Ariana's ability to seamlessly translate vision, mission and culture to a compelling poetic story and performance was the equivalent of being in a theater where you are immersed into a new and present world and culture.

Using authentic musical footage from our boots-on-the ground work in the Democratic Republic of Congo, guests and dignitaries were transformed by her ability to poetically demonstrate the use of prose to bring attendees to their feet and into our world with words that leveraged understanding, depth and musical rhythms.

Her execution was nothing short of an awakening for our audience. Without a doubt any audience will be captivated by her poetic mastery and performance. Ariana will leave you with absolutely no regrets.
